

Mapping the Brook

Saturday, May 14th at 9 AM
Municipal Parking Lot
Brook Street, Dumont NJ

Please join your NJ Watershed Ambassador and the Dumont Shade Tree Commission as we assess **the most valuable natural assets** that:

- control storm water runoff that enters the Hirschfield Brook (and the Hackensack River)
- filter and clean the water
- act as a barrier to debris and toxins
- is a source of the oxygen in the air we all breathe

We will be counting the TREES!

All are welcome — bring your friends, neighbors, Scout troops, students and other residents. **Please wear long pants and sturdy footwear and boots;** you may get a little wet.

Scout troops must have leaders according to the proper ratio as well as parental permission slips (see BSA or GSUSA safety guidelines). All other young people must have adult supervision.

Refreshments will be provided. Anyone needing confirmation of community service will receive a letter noting your valuable donation of time.
